

RAJESH BENNEGERE THEERTHESWARA

CLOUD PLATFORM ENGINEER | DEVOPS | KUBERNETES | TERRAFORM | CI/CD

Leicester, United Kingdom | +44 7352 664675 | rajesh.bt07@gmail.com

PROFESSIONAL SUMMARY

Cloud Platform and DevOps Engineer with 3+ years of experience designing, automating and operating containerised services and developer tooling across AWS and Azure environments. Hands-on with Docker, Kubernetes, Terraform, Azure Bicep, Jenkins, GitHub Actions, GitLab CI/CD, Python, Bash, CloudWatch, Prometheus and Grafana. Builds repeatable infrastructure, deployment pipelines, automated tests, service-health checks and observability for scalable cloud platforms. Experienced in Linux, cloud networking, databases, least-privilege security and production incident diagnosis. Collaborates closely with software engineers and values tested changes, clear documentation and continuous platform improvement.

TECHNICAL SKILLS

- **Cloud Platforms and Networking:** AWS and Microsoft Azure; EC2, EKS, Lambda, S3, DynamoDB, RDS, IAM, STS, VPC, Elastic Load Balancing, CloudWatch, Azure Functions and deployment slots; DNS, TCP/IP, HTTP/HTTPS, firewalls, routing and load balancing
- **Containers and Orchestration:** Docker, Kubernetes, Amazon EKS, kubectl, manifests, deployments, services, ingress, health probes, service accounts and Application Load Balancer integration
- **Infrastructure as Code and Automation:** Terraform, Azure Bicep, Ansible, Python, Bash, reusable modules and templates, infrastructure validation and multi-environment provisioning
- **CI/CD and Developer Tooling:** Jenkins, GitHub Actions, GitLab CI/CD, Azure Pipelines, ServiceNow request workflows, Git, GitHub, GitLab, Bitbucket, parameterised pipelines, automated deployments and release validation
- **Automated Testing and Quality:** unit, integration, browser, security, health, smoke and performance testing; Selenium, k6, security scanning and deployment verification
- **Metrics Monitoring and Incidents:** Prometheus, Grafana, AWS CloudWatch, CloudHealth, Nagios, dashboards, alerts, logs, metrics, incident triage, root-cause investigation and performance troubleshooting
- **Linux and Security:** Linux administration, command-line diagnostics, processes, services, permissions, package management, IAM, RBAC, least privilege and CIS-aligned configuration
- **Databases and Application Services:** PostgreSQL, Amazon RDS, Redis, S3, REST APIs, FastAPI, Node.js, asynchronous processing, cloud-data ingestion and ETL-style synchronisation

PROFESSIONAL EXPERIENCE

Software Engineer - DevOps

Visionet Systems Pvt Ltd, India

Aug 2023 – Jul 2025

- Delivered AWS infrastructure automation, application performance optimisation and FinOps governance initiatives using Terraform, Jenkins, ServiceNow, CloudWatch, CloudHealth and AWS Lambda.
- Reduced deployment cycle time by approximately 60-70% through Jenkins and Terraform automation while supporting AWS monitoring, troubleshooting and operational documentation across multiple environments.

Projects

Self-Service AWS Infrastructure Provisioning Automation

- Engineered reusable Terraform modules to provision EC2 instances, S3 buckets, DynamoDB tables and RDS databases consistently across multiple AWS environments.
- Developed parameterised Jenkins pipelines that executed Terraform validation, planning and deployment after CloudOps approval of infrastructure requests submitted through ServiceNow.
- Reduced manual AWS Console activity and configuration drift by standardising resource configuration, IAM controls, tagging and CloudWatch monitoring.

COTS Application Performance Optimisation

- Led an EPI2ME proof of concept, diagnosed application and infrastructure bottlenecks and supported improvements to scalability and operational performance.
- Created a reusable knowledge base covering identified causes, troubleshooting procedures and validated resolutions.

FinOps Cost Optimisation and Cloud Governance

- Developed CloudWatch and CloudHealth cost dashboards and a standardised tagging framework to improve AWS expenditure visibility, ownership and cost allocation.
- Strengthened cloud governance by reviewing unused IAM roles and developing AWS Lambda automation for approved cost-optimisation activities.

Junior DevOps Engineer

Test Yantra Software Solutions, India

Jun 2022 - Jul 2023

- Developed and maintained Dockerfiles to containerise application components, providing consistent build and runtime environments for development and testing.
- Assisted with infrastructure and environment setup supporting the build, testing and deployment of an Android application.
- Contributed to Jenkins CI/CD pipeline configuration for automated application builds, testing, container packaging and deployment activities.
- Supported releases across Linux and Kubernetes development and test environments, including deployment execution, health checks, smoke validation and initial troubleshooting.
- Performed manual functional and regression testing, documented defects and collaborated with developers to verify fixes before release.
- Created deployment guides, test documentation, standard operating procedures and troubleshooting notes to support repeatable delivery and team knowledge sharing.

ACADEMIC PROJECTS

CostVeo - Explainable FinOps Platform for AWS Cost Visibility and Governed Resource Optimisation

Technologies: AWS, EKS, Terraform, Kubernetes, Docker, GitLab CI/CD, FastAPI, React, PostgreSQL and Redis

- Designed a multi-tenant FastAPI and React FinOps platform using PostgreSQL and Redis, with AWS cost visibility, idle-resource detection, right-sizing and governed recommendations.
- Integrated AWS STS AssumeRole, Cost Explorer, CloudWatch and tagging APIs; containerised services with Docker and Kubernetes and automated EKS delivery through GitLab CI/CD.

Distributed Real-Time Collaboration Platform

- Built a Node.js and Redis application deployed with Docker and Kubernetes on AWS for real-time state synchronisation and scalable multi-user operation.

EDUCATION

Master of Science in Cloud Computing | University of Leicester, United Kingdom | Expected Nov 2026

Bachelor of Engineering in Mechanical Engineering | Siddaganga Institute of Technology, India | 2021

TRAINING AND CERTIFICATIONS

AWS EKS Kubernetes Masterclass - DevOps and Microservices

Udemy
